

The Leader in  
Foot & Ankle Surgery.

# Save the date.

23, 24 November 2012 – Kiel, Germany

*This course will offer orthopaedic surgeons with an interest in foot and ankle surgery the opportunity to learn new techniques and solutions for their patients. This hands-on course will address techniques treating a wide range of indications including hallux valgus, hallux rigidus, and other foot deformities. Each participant will have the ability to practice various techniques using Wright products on cadaveric specimens.*
